<i>MODEL:</i>	<i>( inch - diameter )</i>	<b>CFS</b>	<b>CFS</b>	<b>CFS</b>	<b>CUBIC FEET</b>
MINI-GT3	3" Dia.	0.031	0.02	0.09	39.72
MINI-GT4	4" Dia.	0.042	0.03	0.18	70.74
MINI-GT6	6" Dia.	0.07	0.05	0.7	175.9
MINI-GT8	8" Dia.	0.14	0.1	1.58	367.5
MINI-GT10	10" Dia.	0.29	0.2	2.81	527.5

**Notes:**

\* REM - BFTG: Bioflex (BFTG) Media is designed to capture debris, trash and sediment while sustaining very high treatment rates. Mesh density of 3.5 ounces per square foot minimizes occlusion and blinding while capturing 100% of particles at 5mm or greater in size. Excellent media for Trash Capture applications.

\*\* REM - FOG: The FOG media is housed in a mono-filament weaved geotextile containment pack. FOG media effectively encapsulates liquefied petroleum hydrocarbons (Fats, Oils & Grease including animal fats). It's highly hydrophobic characteristic allows for increased polish of flow resulting in the reduction of Total Suspended Solids (TSS). TSS reduction includes (but is not limited to) debris, trash, silt, sediment and agglomerated heavy metals. This is the standard media that is configured for many Filters. Media options for other pollutants are also available.

\*\*\* REM - FOG -BFTG: Media configuration utilizes both BFTG and FOG media strategies. The BFTG Media serves as a pre-screen to treat for larger debris, trash, and sediment. The FOG media pack captures fine suspended solids and liquefied hydrocarbons.

\*\*\*\* Filter debris capacities are based on the Mini-GT's standard height of 5" (debris holding area). If the exit pipe is deeper, additional volume capacities be increased with custom Mini GT's.

**REM technical support is available to assist with TRITON Series filter configurations, media strategies and customization of models.**
