

REM's TRITON MINI-GT's (For Small Area Drains)

REM designed the TRITON - MiniGT (Area Drain) Filter Series to provide a highly adaptable solution that allows the flexibility of installing a filtering system for smaller area drains. The MiniGT filters may be utilized in new construction or retrofitted in existing area drain structures. The MiniGT's are inserted into the existing area drains, where they are able to capture debris such as litter, sand/silt, etc. They are simply inserted into the existing pipe with little or no tools required. They are sized to spec or modified in the field for downspouts with unusual dimensions. Media strategy may be optimized for specific pollutant concerns.

Notes:

- The TRITON - MiniGT Series Filters are available in all sizes to fit most industry standard area drains. Custom sizes are also available to fit most applications.
- Filter cartridge housings are constructed utilizing Schedule 40 PVC (Polyvinyl Chloride)
- Debris Ring constructed of HDPE, High Density Polyethylene Plastic.
- Rubber gasket constructed of 1/8" Neoprene, 50 Duro.
- SS-Housings are constructed utilizing Type 304 Perforated Stainless Steel.
- REM TRITON replacement Filter Media Packs are charged with REM FOG media an expanded volcanic ash medium treated to be highly hydrophobic housed in a durable geo-textile perforated polypropylene woven fabric. REM FOG media effectively encapsulates liquefied petroleum hydrocarbons (Fats, Oils & Grease including animal fats). The media's hydrophobic characteristic allows for greater polishing of flow resulting in the reduction of Total Suspended Solids (TSS). Suspended solid reduction includes but is not limited to debris, trash, silt sediment and agglomerated heavy metals. (Additional media options are available including mixed blends of granulated carbon [AC] and Zeolite [ZEO].)
- MiniGT's are easily removed from area drain for easy maintenance.
- Filter designs include a high flow overflow bypass to eliminate pooling or flooding during heavy rain events.
- See our Specifier Sheet for sizes, models and flow rate information.
- Maintenance information and replacement REM Media Packs are available upon request by contacting REM at sales@remfilters.com or (888) 526-4736.
- Made in the USA.
