

TRITON TOP HAT and Crescent Filter SERIES

(Catch Basin Design Configurations)

REM Inc.

TRITON Crescent Filter Configurations are recommended in catch basins having a single exit pipe.

- Crescent Filters maximize capturing area and treatment rates in shallow and small catch basins.
- Crescent Filters provide flexibility for irregular asymmetrical catch basins.
- Crescent Filters are not recommend in catch basins with incoming subterranean pipes.

Single Exit Pipe Configuration

TRITON Top Hat Filters used in both end of line single exit pipes and flow through piping below
