

# REM Weighted Walnut Wattle (Erosion and Pollution Control) Series

The Weighted Walnut Wattle was designed with the intent of reducing pollution being delivered by urban water runoff to beaches, streams, wetlands and other bodies of water. The filter provides homeowners, commercial property owners, municipal employees and construction personnel with a method of significantly reducing urban water runoff pollution. The Weighted Walnut Wattles™ can be used as part of your “Storm Water Pollution Prevention Plan” and also conforms to urban water runoff “Best Management Practices.”

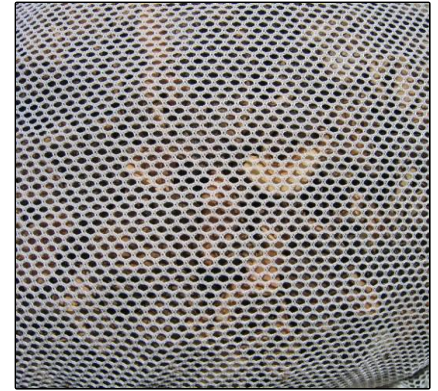

Shown here capturing stucco and plaster from a jobsite

Multiple filtered stages  
 First Wattle: Heavy/large pollutants  
 Second Wattle: Finer filter polishing

Erosion control for catch basin protection

Patented, filter housing design is self arresting of tears and has a large diameter versus length expansion ratio that allows the Wattle to conform to uneven terrain.

Erosion control for Trench or V-ditches

Easy storage for Weighted Wattles

Easy Lift Handles with Cable Ties

## Notes:

- The Weighted Walnut Wattle are composed of biodegradable, fractured walnut shell.
- Walnut shell provides superior sediment control and filtration.
- The dense heavy walnut shell provides the weight for resistance to water force.
- The dense weight does not allow the wattle to float, keeping the wattle in place, even under water.
- Dense media provides 3.5 lbs. per foot of resistance weight.
- Temporary and reusable erosion control, inlet protection and water treatment.
- Water flow rate reduction.
- Can be linked together to form unlimited lengths.
- Can be washed, dried and re-used.
- Made in the USA!
- Maintenance information and replacement wattles are available upon request by contacting REM at sales@remfilters.com or (888) 526-4736.

Stock Sizes	Model Number
4' foot	= Model: WWW-04-48
6' foot	= Model: WWW-04-72
10' foot	= Model: WWW-04-120
(Custom sizes also available)
